Summary

AI-focused Engineer with experience in building GenAI-powered systems, RAG pipelines, and AI-assisted developer workflows. Skilled in prompt engineering, automation, and applying AI tools like ChatGPT and GitHub Copilot to improve productivity, documentation, and system design. Passionate about enabling teams to adopt AI for faster and smarter development.

Education

- **B.E. ENTC** at Marathwada Mitra Mandal's College of Engineering, Pune
Nov 2022 – May 2026 | **CGPA: 9.24 / 10**
- **H.S.C.** at Modern College of Arts, Science & Commerce, Pune
2020 – 2022 | **74.17%**
- **S.S.C.** at St. Francis De Sales School, Pune
2007 – 2020 | **89.80%**

Experience

Backend Intern(AWS Cloud) - EvolvingX Pvt. Ltd.

Oct 2024 – June 2025

- Developed and maintained a full-stack web platform using React (frontend) and Django (backend), enabling dynamic user interactions and RESTful API integration.
- Deployed the complete application on AWS EC2, with production environment configuration, HTTPS setup, and database integration.
- Optimized backend performance and ensured secure API communication through token validation and middleware customization.

Projects

LexVault (Smart Legal Document Manager)

Github Repo: [Lexvault](#)

- Built a full-stack document version control system ensuring immutable audit history and version traceability.
- Designed a PostgreSQL schema for version indexing and efficient retrieval of document histories.
- Developed REST APIs and a React dashboard to manage document lifecycles and timelines.
- Optimized backend performance for handling large document comparisons and concurrent updates

Skills : FastAPI, PostgreSQL, SQL, REST API Design, Database Schema Design, Version Control Systems, Data Modeling.

TraceLens

Github Repo: [Tracelens](#) | Design Report : [Report](#)

- Built a cloud-native system for automated root cause analysis of distributed microservice failures using a RAG pipeline with sentence-transformer embeddings and zero LLM dependency.
- Designed a stateless FastAPI service integrating Logs for cross-service trace correlation, deployable locally or on AWS Lambda.
- Implemented a vector similarity-based failure pattern engine with confidence scoring and actionable remediation.

Skills : Sentence-Transformers (all-MiniLM-L6-v2), RAG, NumPy, Pydantic, Vector Similarity Search, Cosine Similarity, NLP Embeddings

HFT Latency Monitoring Platform

Github Repo: [LatencyMonitor](#) | Design Report : [Report](#)

- Built a sub-millisecond UDP ingestion pipeline with P50/P95/P99 latency tracking on Kubernetes.
- Implemented Prometheus histograms and Grafana dashboards for real-time performance observability.
- Containerized a multi-service Go architecture using Docker and Kubernetes, debugging runtime issues for reliable deployments.

Skills : Low-latency systems, Go concurrency, Docker, Kubernetes, Prometheus/Grafana, Linux debugging, UDP pipelines.

Skills

- **Fundamentals :** Operating Systems, DBMS, Networking, OOP, DSA, SDLC, system design
- **Software Development :** Python(Django, FASTAPI), API Design, Microservices, React
- **Cloud/DevOps :** AWS (EC2, S3, VPC, Lambda, IAM), Terraform, Docker, GitHub Actions, CI/CD pipelines
- **GenAI & Intelligent Systems :** LLM integration, (RAG), vector embeddings, structured prompt engineering
- **AI Tools and Productivity :** Antigravity, GitHub Copilot, Claude, Gemini, Prompt engineering, debugging, and documentation, AI-assisted development workflows, Automation using LLMs (content generation, summarization, workflows)

Achievements

- **AIR 2** SAENIS Efficycle 2024
- **Winner** at Hackathons like Udaan 2023 and Dextirity 2024
- **Presented research papers at conferences like ICEI and GConSoft**
